Stain

Classic Cedar

Walnut

Russet Brown

Our stain is a peraffinic oil-based stain, sealant and preservative, made in Plano, Texas, with fungicides and mildewcides designed specifically for our unique North Texas climate.

Pre-stained wood is available, however, TSFC recommends waiting 3-4 weeks after construction to stain the fence. This gives the wood time to completely dry and cure under the sun. This allows for deeper stain penetration, a more consistent color, and a longer lasting finish.

Trim

We have a variety of trim options: 1. Standard; 2. Top Cap with Standard 1x4 Trim; 3. Top Cap with 1x4 and 1x2 Double Trim; 4. 1x2 Double Trim without Top Cap; 5. Top Cap with 1x6 Arched Trim and Corbels.

Ornamental Iron Experts

No matter if you want something simple and standard or complex and custom, we are ornamental iron experts. We can custom build iron to match any design such as a gate specially designed to match our client's front door.

Retaining Walls

WOOD: All wood retaining walls are custom made to fit your yard's unique specifications. To prevent warping and bowing, we use high quality, pressure treated wood. To ensure stability, we install heavy gauge steel posts every 3 feet across all wood walls.

STONE: There are few building materials that exhibit all the unique benefits natural stone can offer. Our experienced stone craftsman can make the most of each piece of material they use when creating your stone masterpiece.

We build architecturally sound, quality engineered walls using hand selected stone. You can choose from a wide variety of construction techniques and colors to get the desired look for your taste.

What Makes Our Fences so Great...

OUR WOOD QUALITY IS SECOND TO NONE: We use grade #1 Western Cedar and Premium Grade Whitewood from select mills in North America. We take pride in our superior materials and craftsmanship.

STEEL POSTS THAT SET US APART:

We use heavy gauge galvanized .95 steel posts because we do not cut corners. The posts we use are made for fences unlike the weaker imitations.

POST COVERS PROVIDE A CUSTOM FINISH:

We can cover your posts to give an all-wood finish if you prefer not to see the shiny steel posts. Just another example of how we strive to meet your needs.

GET WHAT YOU PAY FOR:

We use true rough Cedar 2"x4" horizontal rails that match our Cedar pickets and absorb the stain, without substituting them for "Pine" or "Treated Rails" to cut costs.

PROTECTION YOUR FENCE NEEDS:

We attach a 2"x6" ACQ Treated Baseboard along the bottom of the fence which allows for the pickets to be raised off the ground to protect against rot and damage during lawn care.

Quality work, custom design and affordability—Any one of these services might be enough for most fence companies. But at Texas State Fence Company, we offer all three and we have hundreds of satisfied customers each year to prove it. Whether you're looking for a traditional wooden fence or a wrought iron fence with gate access, we have the expertise to build the perfect fence for you.

As a full service professional fence installation company, we are known for providing our clients with high end, quality fences at competitive prices. TSFC consistently delivers outstanding customer service by completing projects on time and using the highest quality of materials.

Because we understand the importance of superior, quality care, our craftsmen and builders have over eighteen years experience building superior fences and are dedicated to meet your specific design needs. Our trained installation teams are easy to work with and are great communicators.

And at Texas State Fence Company, we stand behind our work. We're insured, we guarantee our work, and we'll be here when the others have left town. As a result, over 70% of our business comes from client referrals. You'll be proud when your neighbors stop by and ask, "Who built your fence?"
